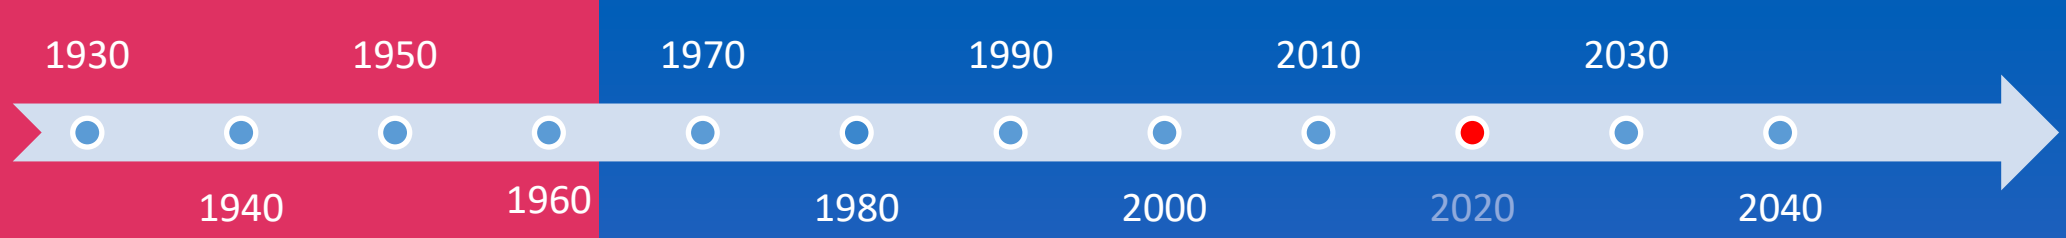
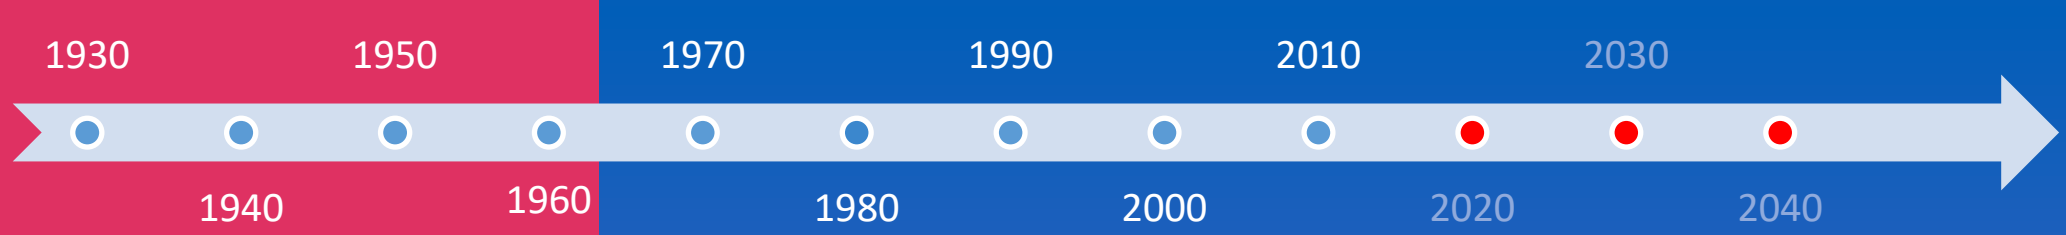
What's next in Project Management?



While the current trends will become more popular and "must have"…

- Change management
- Agility
- Integrated project management
- Extensive use of various tools
- Managing remote teams
- Emotional Intelligence
- ESG



..new trends may rise

because…

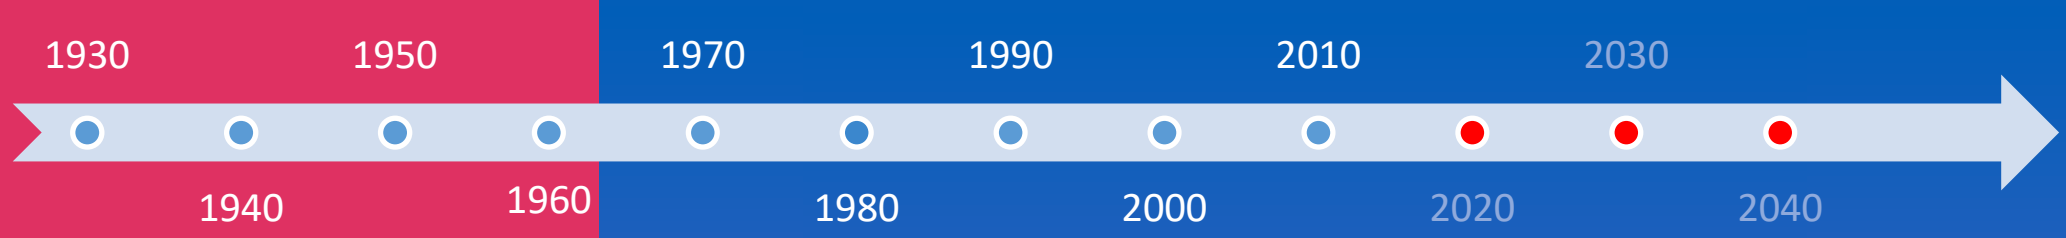
Poor data quality costs the US economy up to **$3.1 trillion yearly**

In 2020, every person generated **1.7 megabytes in just a second**

10.7% of people all around the globe experienced a mental health disorders (as depression, anxiety etc) in **2017**

Generation Z and Millennials are going to make up over **75%** of the workforce in **less than 10 years**

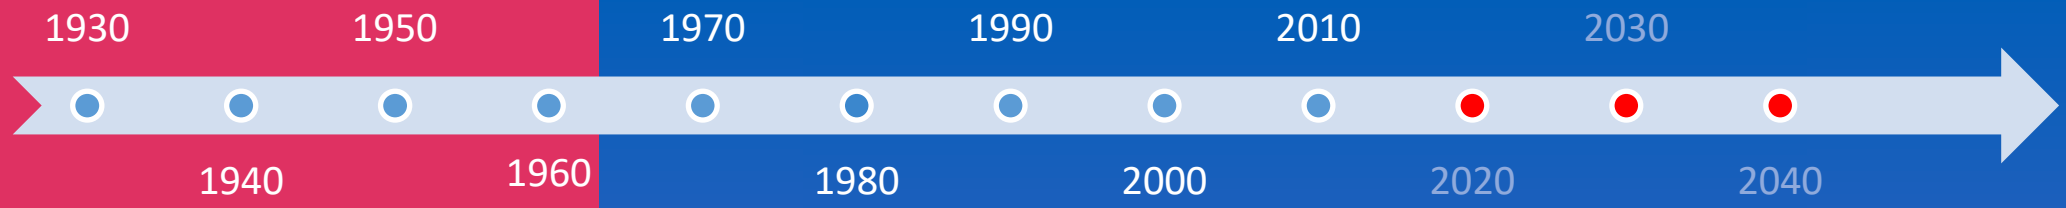
47% of all jobs will be replaced by robots or are at risk of automation in the **next 14 years**



Trend 1:

Use AI-based solutions and automation

- Workers spend 4 hours and 38 minutes per week on average performing duplicate tasks that could be automated
- The payback achieved by those that have implemented and scaled RPA has been 12 months.
- More than 90% of C-level executives using intelligent automation say their organization performs above average in managing organizational change in response to emerging business trends. (IBM)



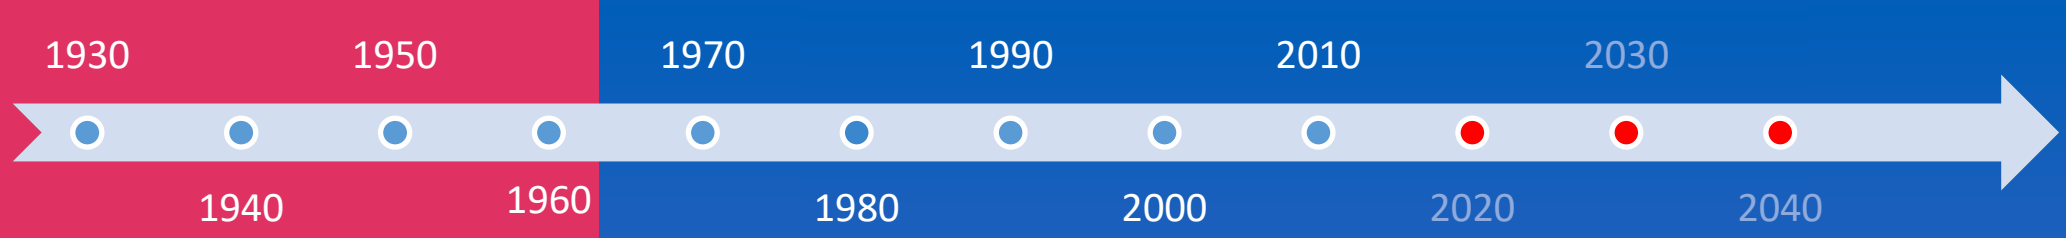
Trend 1:

Use AI-based solutions and automation

- Repetitive tasks
- Risk management
- Monitoring of project's progression
- Process automation

UiPath™

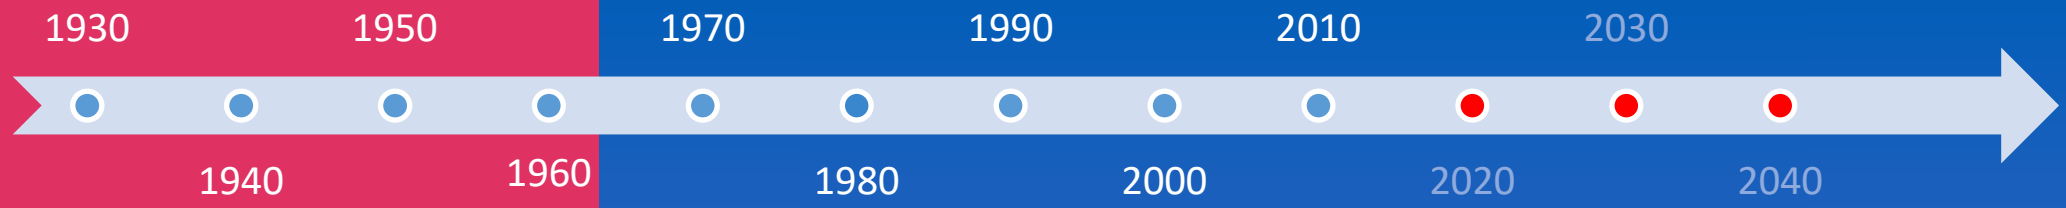
AUTOMATION ANYWHERE
Go be great.



Trend 2:

Focus on data analytics

- In 2020, every person generated 1.7 megabytes in just a second.
- Internet users generate about 2.5 quintillion bytes of data each day.
- 95% of businesses cite the need to manage unstructured data as a problem for their business.
- 97.2% of organizations are investing in big data and AI.
- Using big data, Netflix saves $1 billion per year on customer retention.
- Predictions estimate the world will generate 181 zettabytes of data by 2025



Trend 2:

Focus on data analytics

Providing help for fast decisions regarding:

- Planning
- Allocating resources
- Risk management
- Budget control

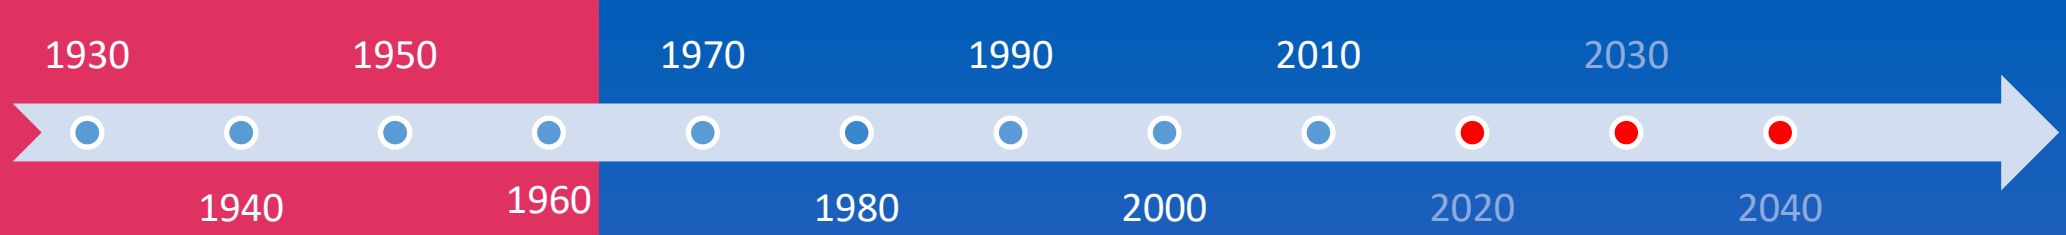
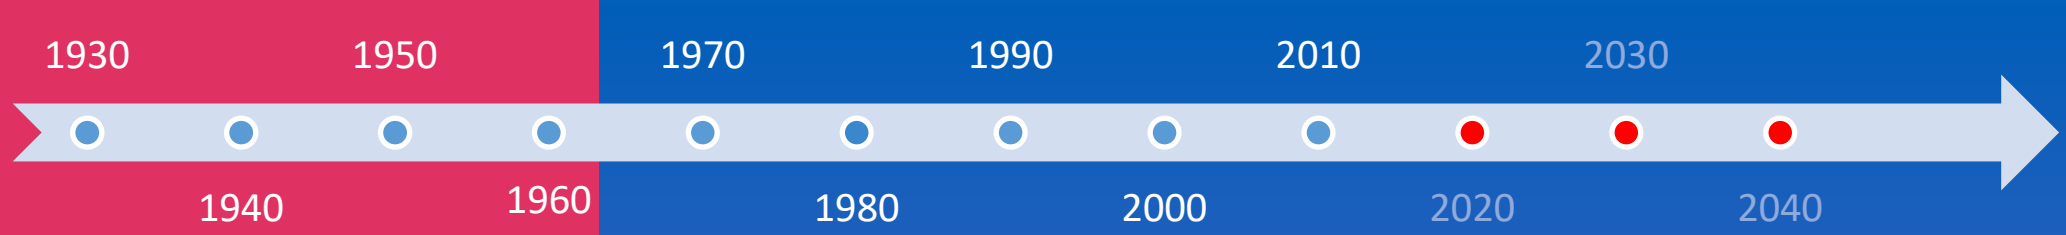
Palantir



Trend 3:

Caring for mental health

- Internet users spend 40% of their time online. The average person sleeps for about 8 hours. That leaves about 16 hours of awake time. What do users do with that time? Well, almost half is spent online.
- In 2023, global internet users will spend 12.5 trillion hours online?



Trend 3:

Caring for mental health

- Asking your team for regular feedback if they are overloaded with their work.
- Creating a supportive atmosphere where the needs of each team member are taken care of, and no one feels left out.
- Leading by example.
- Providing professional mental support from psychologists.
- Giving more freedom to employees where they can work the way they want
